ABOUT

ML engineer with 2 years of commercial experience. I strive to build ML solutions that take over routine work and give people more time for what truly matters. 5th-year student at HSE University.

EXPERIENCE

RT-Information Security

Senior Machine Learning Engineer

September 2026 - Present

- Developed an LLM-based service for detecting domain squatting and identifying potentially malicious domains.
- Developed an LLM-based service for normalizing questionnaires using structured output.
- Designed an internal platform for hosting automations with built-in user feedback collection.
- Conducted technical interviews and onboarded new team members.

Machine Learning Engineer

December 2024 - September 2026

- Developed and deployed to production an LLM agent on LangGraph that prepares structured incident reviews for analysts before escalation.
- Built an LLM pipeline for automatic generation of incident filtering rules with safeguards against model hallucinations.
- Developed an end-to-end CatBoost classifier for false-positive incidents with 0.98 recall and 0.3 precision on true incidents.
- Developed an alert stream monitoring system that detects anomalous deviations and notifies engineers and clients of potentially critical situations.
- Refactored the incident grouping service, simplifying the replacement and comparison of retrieval models.
- Introduced code quality practices within the team using linters and static typing.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **ML & LLM:** pandas, numpy, scikit-learn, CatBoost, XGBoost, PyTorch, LangGraph, vLLM, Langfuse
- **Backend & MLOps:** FastAPI, Docker, GitLab CI/CD, Airflow, Prefect, MLflow, MinIO, PostgreSQL, RabbitMQ, Grafana
- **Developer Tools:** git, uv, ruff, mypy
- **English:** B2

PET PROJECTS

- **snowcite** - MCP server for literature reviews with search across arXiv, Semantic Scholar, OpenAlex, and PubMed, and PDF generation via LaTeX/Typst.
- **GameGlory** - game idea analysis service: semantic competitor search, LLM-based idea scoring with risk assessment, Steam catalog data collection, and estimation of hidden metrics (revenue, publisher tier).

EDUCATION

HSE University, Specialist degree in Computer Security

2022 - 2028 (expected)
