SUMMARY

ML Engineer with 2 years of commercial experience. Focus areas: LLM services and agentic pipelines, classical ML, MLOps. 5th-year student at HSE University.

WORK EXPERIENCE

RT Information Security, Machine Learning Engineer

Dec 2024 - Present

- Built and shipped a production LLM agent for incident triage on LangGraph, cutting analyst review time by delivering a structured incident breakdown before escalation
- Automated exception-rule writing with an LLM pipeline on self-hosted vLLM, covering ~70% of cases and replacing manual work with review of generated rules
- Trained and deployed a CatBoost alert classifier that filters out ~30% of false positives while retaining 99% of true ones
- Deployed an anomaly detector across ~100 event sources with automatic method selection, running in production on a 10-minute interval
- Rewrote the incident-grouping service covering ~15% of all groupings, making retrieval models faster to swap and compare
- Established the team's MLOps infrastructure (CI/CD, dataset and artifact versioning, code-quality standards), speeding up the start of new ML projects
- Ran technical interviews for candidates and onboarding for new team members

GameGlory (gameglory.studio), Machine Learning Engineer, project work

Oct 2025 - Present

- Built semantic competitor search based on game description and tags
- Built LLM-based idea analysis: scoring across key aspects with recommendations and risk assessment
- Set up data collection over Steam games catalogue and estimation of metrics unavailable directly (revenue, publisher tier)

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Frameworks & Libraries:** pandas, numpy, scikit-learn, CatBoost, XGBoost, PyTorch, FastAPI, LangGraph, vLLM, Langfuse
- **MLOps & Infrastructure:** Docker, GitLab CI/CD, Airflow, MLflow, MinIO, PostgreSQL, RabbitMQ, Grafana
- **Dev Tools:** git, ruff, mypy, uv
- **Spoken Languages:** English (B2), Russian (native)

PET PROJECTS

- **snowcite** - MCP server for literature review: search across arXiv/Semantic Scholar/OpenAlex/PubMed, PDF via LaTeX/Typst

EDUCATION

HSE University, Specialist Degree (5-year) in Computer and Information Systems Security

2022 - 2028 (expected)
